Elements

Name	Description	Type
ADO NET Source	Consumes data from SQL Server, OLE DB, ODBC, or Oracle, using the corresponding .NET Framework data provider. Use a Transact-SQL statement to define the result set. For example, extract data from SQL Server with the .NET Framework data provider for SQL Server.	ComponentMetaDataCollection
ADO NET Source Output		PathCollection
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Data Conversion 1	Data Conversion	ComponentMetaDataCollection
Data Conversion Output		PathCollection

OLE DB Destination 1	OLE DB Destination	ComponentMetaDataCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Package element: CDSUniqueID

Properties

Name	Value
CodePage	0
DataType	DT_NUMERIC
Description	
ID	639
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].ExternalColumns[CDSUniqueID]
Length	0
MappedColumnID	0
Name	CDSUniqueID
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	10
Scale	0

Package element: Cell Saver Operator

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	710
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].ExternalColumns[Cell Saver Operator]
Length	101
MappedColumnID	0
Name	Cell Saver Operator
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: CheckinBy

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	653
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].ExternalColumns[CheckinBy]
Length	101
MappedColumnID	0
Name	CheckinBy
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: CheckinDTTM

Properties

Name	Value
CodePage	0
DataType	DT_DBTIMESTAMP
Description	
ID	652
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].ExternalColumns[CheckinDTTM]
Length	0
MappedColumnID	0
Name	CheckinDTTM
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: CheckinDTTM

Properties

Name	Value
CodePage	0
ComparisonFlags	0
DataType	DT_DBTIMESTAMP
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	652

ID	549
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].Columns[CheckinDTTM]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	0
LineageID	27
MappedColumnID	0
Name	CheckinDTTM
ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	ADO NET Source
UsageType	UT_READONLY

Package element: Circulator

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	707
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].ExternalColumns[Circulator]
Length	101
MappedColumnID	0
Name	Circulator
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: Copy of MRN

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	640
ID	582

IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].Columns[Copy of MRN]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	101
LineageID	371
MappedColumnID	0
Name	Copy of MRN
ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	Data Conversion 1
UsageType	UT_READONLY

Package element: Copy of nhsnumber

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	637
ID	581
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].Columns[Copy of nhsnumber]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	10
LineageID	368
MappedColumnID	0
Name	Copy of nhsnumber
ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	Data Conversion 1
UsageType	UT_READONLY

Package element: Copy of SchOperatingRoom

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	643
ID	585
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].Columns[Copy of SchOperatingRoom]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	50
LineageID	380
MappedColumnID	0
Name	Copy of SchOperatingRoom
ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	Data Conversion 1
UsageType	UT_READONLY

Package element: Copy of SchSurgeryTime

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	645
ID	584
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].Columns[Copy of SchSurgeryTime]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	255
LineageID	377
MappedColumnID	0
Name	Copy of SchSurgeryTime
ObjectType	OT_INPUTCOLUMN

Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	Data Conversion 1
UsageType	UT_READONLY

Package element: Copy of SchSurgicalArea

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	642
ID	583
IdentificationString	OLE DB Destination 1.Inputs[OLE DB Destination Input].Columns[Copy of SchSurgicalArea]
IsAssociatedWithOutputColumn	True
IsValid	True

Value	

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Elements

Name	Description	Type
ADO NET Source	Consumes data from SQL Server, OLE DB, ODBC, or Oracle, using the corresponding .NET Framework data provider. Use a Transact-SQL statement to define the result set. For example,	ComponentMetaDataCollection

	extract data from SQL Server with the .NET Framework data provider for SQL Server.	
ADO NET Source Output		PathCollection
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Data Conversion 1	Data Conversion	ComponentMetaDataCollection
Data Conversion Output		PathCollection
OLE DB Destination 1	OLE DB Destination	ComponentMetaDataCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection

OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Value	

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.

FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Cancelled Ops Import Table	OLE DB Destination	ComponentMetaDataCollection
Cancelled Ops Landing Table	OLE DB Source	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{B4851F60-170A-45CD-9136-4A94CD37DFAA}
Description	The OLE DB runtime connection used to access the database.
ID	14
IdentificationString	Cancelled Ops Import Table.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	4
IdentificationString	Cancelled Ops Import Table.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	[dbo].[IMS.tblTheatresCANImport]

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	5
IdentificationString	Cancelled Ops Import Table.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT

Version	7

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
OLE DB Source Error Output		OutputCollection
OLE DB Source Output		OutputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
ParameterMapping	The mappings between the parameters in the SQL command and variables.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection
SqlCommandVariable	The variable that contains the SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{B4851F60-170A-45CD-9136-4A94CD37DFAA}
Description	The OLE DB runtime connection used to access the database.
ID	109
IdentificationString	Cancelled Ops Landing Table.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	101
IdentificationString	Cancelled Ops Landing Table.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	[dbo].[tblTheatresCANRecsLanding]

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	102
IdentificationString	Cancelled Ops Landing Table.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: ParameterMapping

Properties

Name	Value
ContainsID	False
Description	The mappings between the parameters in the SQL command and variables.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	108
IdentificationString	Cancelled Ops Landing Table.Properties[ParameterMapping]
Name	ParameterMapping
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE

Value	

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	OLE DB Destination Input
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes

	information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

This Data Flow no longer required - kept for reference

No longer used - kept for reference purposes

Package element: New Import from landing table to Import Table

Properties

Name	Value
ApartmentThreaded	False
AutoGenerateIDForNewObjects	True
BLOBTempStoragePath	
BufferTempStoragePath	
CreationName	SSIS.Pipeline.4
DebugMode	False
DefaultBufferMaxRows	10000
DefaultBufferSize	10485760
DelayValidation	False
Description	Data Flow Task
Disable	False
DisableEventHandlers	False
EnableCacheUpdate	True
EnableDisconnectedColumns	False
EngineThreads	10

ExecutionDuration	0
ExecutionResult	Success
ExecutionStatus	None
FailPackageOnFailure	False
FailParentOnFailure	False
ForcedExecutionValue	0
ForceExecutionResult	None
ForceExecutionValue	False
HasExpressions	False
HostType	Task
ID	{62D46802-25BB-46C8-AA31-71CFBD695B2A}
IsDefaultLocaleID	True
IsolationLevel	Serializable
IsSavingXml	False
LocaleID	English (United Kingdom)
LoggingMode	UseParentSetting
MaximumErrorCount	1
Name	New Import from landing table to Import Table
RunInOptimizedMode	True
SuspendRequired	False
TransactionOption	Supported

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Import Table	OLE DB Destination	ComponentMetaDataCollection
Landing Table	OLE DB Source	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos

Package element: BufferSizeTuning

Properties

Name	Value
CreationName	
Description	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.
FrequencyHint	Proportional
Name	BufferSizeTuning

Package element: Import Table

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{63F60893-F24D-421A-A481-86C53A0ADBA8}
ContactInfo	OLE DB Destination;Microsoft Corporation; Microsoft SQL Server; (C) Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;4
Description	OLE DB Destination
ID	2
IdentificationString	Import Table
IsDefaultLocale	True
LocaleID	English (United Kingdom)
Name	Import Table
ObjectType	10
PipelineVersion	0
UsesDispositions	True
ValidateExternalMetadata	True
Version	4

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection

FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value
ContainsID	False
Description	Specifies the mode used to access the database.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	9
IdentificationString	Import Table.Properties[AccessMode]
Name	AccessMode
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	AccessMode
UITypeEditor	
Value	3

Package element: AlwaysUseDefaultCodePage

Properties

Name	Value
ContainsID	False
Description	Forces the use of the DefaultCodePage property value when describing character data.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	8
IdentificationString	Import Table.Properties[AlwaysUseDefaultCodePage]
Name	AlwaysUseDefaultCodePage
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor

Name	FastLoadKeepIdentity
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	False

Package element: FastLoadKeepNulls

Properties

Name	Value
ContainsID	False
Description	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	11
IdentificationString	Import Table.Properties[FastLoadKeepNulls]
Name	FastLoadKeepNulls
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	False

Package element: FastLoadMaxInsertCommitSize

Properties

Name	Value
ContainsID	False
Description	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	13
IdentificationString	Import Table.Properties[FastLoadMaxInsertCommitSize]
Name	FastLoadMaxInsertCommitSize
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	

UITypeEditor	
Value	2147483647

Package element: FastLoadOptions

Properties

Name	Value
ContainsID	False
Description	Specifies options to be used with fast load. Applies only if fast load is turned on.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	12
IdentificationString	Import Table.Properties[FastLoadOptions]
Name	FastLoadOptions
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	203
ID	82
IdentificationString	Import Table.Inputs[OLE DB Destination Input].Columns[Other]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	1000
LineageID	336
MappedColumnID	0
Name	Other
ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	Landing Table
UsageType	UT_READONLY

Package element: PACU Practitioner

Properties

Name	Value

CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	200
ID	79
IdentificationString	Import Table.Inputs[OLE DB Destination Input].Columns[PACU Practitioner]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	101
LineageID	333
MappedColumnID	0
Name	PACU Practitioner
ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	Landing Table
UsageType	UT_READONLY

Package element: PACU Practitioner

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	200
IdentificationString	Import Table.Inputs[OLE DB Destination Input].ExternalColumns[PACU Practitioner]
Length	101
MappedColumnID	0
Name	PACU Practitioner
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: Paediatrician

Properties

Name	Value
CodePage	1252

DataType	DT_STR
Description	
ID	204
IdentificationString	Import Table.Inputs[OLE DB Destination Input].ExternalColumns[Paediatrician]
Length	101
MappedColumnID	0
Name	Paediatrician
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: PatientForename

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	235
IdentificationString	Import Table.Inputs[OLE DB Destination Input].ExternalColumns[PatientForename]
Length	40
MappedColumnID	0
Name	PatientForename
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: PatientForename

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	235
ID	109
IdentificationString	Import Table.Inputs[OLE DB Destination Input].Columns[PatientForename]
IsAssociatedWithOutputColumn	True
IsValid	True
Length	40
LineageID	363

MappedColumnID	0
Name	PatientForename
ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	Landing Table
UsageType	UT_READONLY

Package element: PatientSurname

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	234
IdentificationString	Import Table.Inputs[OLE DB Destination Input].ExternalColumns[PatientSurname]
Length	40
MappedColumnID	0
Name	PatientSurname
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: PatientSurname

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	234
ID	108

Package element: OleDbConnection

Properties

Name	Value

ConnectionManager	
ConnectionManagerID	{B4851F60-170A-45CD-9136-4A94CD37DFAA}
Description	The OLE DB runtime connection used to access the database.
ID	14
IdentificationString	Import Table.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	4
IdentificationString	Import Table.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	[dbo].[IMS.tblTheatresACTImport]

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	5
IdentificationString	Import Table.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	6
IdentificationString	Import Table.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	Microsoft.DataTransformationServices.Controls.ModalMultilineStringEditor, Microsoft.DataTransformationServices.Controls, Version=12.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91

Version	7

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection

DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
OLE DB Source Error Output		OutputCollection
OLE DB Source Output		OutputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
ParameterMapping	The mappings between the parameters in the SQL command and variables.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection
SqlCommandVariable	The variable that contains the SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value
ContainsID	False
Description	Specifies the mode used to access the database.

Description	
ID	480
IdentificationString	Landing Table.Outputs[OLE DB Source Output].ExternalColumns[List Owner]

Length	10
MappedColumnID	0
Name	List Owner
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: MappedOPCS

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	423
IdentificationString	Landing Table.Outputs[OLE DB Source Output].ExternalColumns[MappedOPCS]
Length	101
MappedColumnID	0
Name	MappedOPCS
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: MappedOPCS

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	423
ID	310
IdentificationString	Landing Table.Outputs[OLE DB Source Output].Columns[MappedOPCS]
Length	101

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{B4851F60-170A-45CD-9136-4A94CD37DFAA}
Description	The OLE DB runtime connection used to access the database.

ID	268
IdentificationString	Landing Table.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	260
IdentificationString	Landing Table.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	[dbo].[tblTheatresACTRecsLanding]

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	261
IdentificationString	Landing Table.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: ParameterMapping

Properties

Name	Value

ContainsID	False
Description	The mappings between the parameters in the SQL command and variables.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	267
IdentificationString	Landing Table.Properties[ParameterMapping]
Name	ParameterMapping
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	262
IdentificationString	Landing Table.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	OLE DB Destination Input
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional

Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: SN - CTm - Patient - Out Room Time

Properties

Name	Value
CodePage	0
DataType	DT_DBTIMESTAMP
Description	
ID	245
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[SN - CTm - Patient - Out Room Time]
Length	0
MappedColumnID	0
Name	SN - CTm - Patient - Out Room Time
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: SN - CTm - Surgery - Start Time

Properties

Name	Value
CodePage	0
DataType	DT_DBTIMESTAMP
Description	
ID	246
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[SN - CTm - Surgery - Start Time]
Length	0
MappedColumnID	0
Name	SN - CTm - Surgery - Start Time
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: SN - CTm - Surgery - Start Time

Properties

Name	Value
CodePage	0
ComparisonFlags	0

DataType	DT_DBTIMESTAMP
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	246
ID	120
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[SN - CTm - Surgery - Start Time]
Length	0

ConnectionManager	
ConnectionManagerID	{B4851F60-170A-45CD-9136-4A94CD37DFAA}
Description	The OLE DB runtime connection used to access the database.
ID	35
IdentificationString	OLE DB Source.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	27
IdentificationString	OLE DB Source.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	[dbo].[IMS.tblTheatresACTImport]

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	28
IdentificationString	OLE DB Source.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: ParameterMapping

Properties

Name	Value
ContainsID	False
Description	The mappings between the parameters in the SQL command and variables.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	34
IdentificationString	OLE DB Source.Properties[ParameterMapping]
Name	ParameterMapping
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	29

IdentificationString	OLE DB Source.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	Microsoft.DataTransformationServices.Controls.ModalMultilineStringEditor, Microsoft.DataTransformationServices.Controls, Version=12.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91
Value	

Package element: SqlCommandVariable

Properties

Name	Value
ContainsID	False
Description	The variable that contains the SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	30
IdentificationString	OLE DB Source.Properties[SqlCommandVariable]
Name	SqlCommandVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	OLE DB Destination Input
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes

	information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
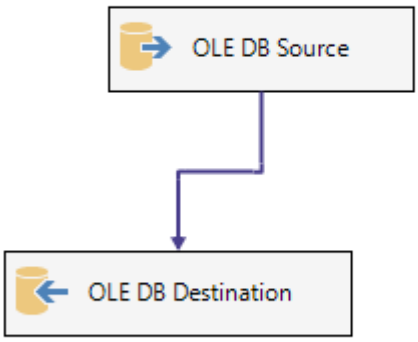
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization



Annotations

Package element: Prepare Staging For New Import Of Cancelled Theatre Recs

Properties

Name	Value
CreationName	STOCK:SEQUENCE
DebugMode	False
DelayValidation	False
Description	Prepare Staging For New Import Of Cancelled Theatre Recs
Disable	False
DisableEventHandlers	False
ExecutionDuration	0
ExecutionResult	Success
ExecutionStatus	None
FailPackageOnFailure	False
FailParentOnFailure	False
ForcedExecutionValue	0
ForceExecutionResult	None
ForceExecutionValue	False
HasExpressions	False

ID	{46AD2FF7-63F2-428C-B529-5B931000C56F}
IsDefaultLocaleID	True
IsolationLevel	Serializable
LocaleID	English (United Kingdom)
LoggingMode	UseParentSetting
MaximumErrorCount	1
Name	Prepare Staging For New Import Of Cancelled Theatre Recs
SuspendRequired	False
TransactionOption	Supported

Precedence constraints

Constraint name	Source executable		Destination executable	Evaluation operation	Multiple constraint evaluation	Expression
Constraint 1	Clear Theatres CAN Hash Table	->	Move Previous Load Hashes from Import to Hash Table	Constraint		
Constraint 2	Move Previous Load Hashes from Import to Hash Table	->	Clear Theatre CAN Import Table	Constraint		

Executables

Name	Description
Clear Theatre CAN Import Table	Clear previous load Import from IMS.tblTheatresCANImport
Clear Theatres CAN Hash Table	Execute SQL Task
Move Previous Load Hashes from Import to Hash Table	Data Flow Task

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
OLE DB Destination	OLE DB Destination	ComponentMetaDataCollection
OLE DB Source	OLE DB Source	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos

Version	4

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will	CustomPropertyCollection

	have their default values inserted at the destination. Applies only if fast load is turned on.	
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{B4851F60-170A-45CD-9136-4A94CD37DFAA}
Description	The OLE DB runtime connection used to access the database.
ID	34
IdentificationString	OLE DB Source.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	26
IdentificationString	OLE DB Source.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT

TypeConverter	
UITypeEditor	
Value	[dbo].[IMS.tblTheatresCANImport]

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	27
IdentificationString	OLE DB Source.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: ParameterMapping

Properties

Name	Value
ContainsID	False
Description	The mappings between the parameters in the SQL command and variables.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	33
IdentificationString	OLE DB Source.Properties[ParameterMapping]
Name	ParameterMapping
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False

Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	28
IdentificationString	OLE DB Source.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	Microsoft.DataTransformationServices.Controls.ModalMultilineStringEditor, Microsoft.DataTransformationServices.Controls, Version=12.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91
Value	

Package element: SqlCommandVariable

Properties

Name	Value
ContainsID	False
Description	The variable that contains the SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	29
IdentificationString	OLE DB Source.Properties[SqlCommandVariable]
Name	SqlCommandVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	OLE DB Destination Input
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional

Name	PipelineInitialization

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Derived Column Output		PathCollection
Get Start Date	Creates new column values by applying expressions to transformation input columns. Create new columns or overwrite existing ones. For example, concatenate the values from the 'first name' and 'last name' column to make a 'full name' column.	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos

Staging Import Source	OLE DB Source	ComponentMetaDataCollection
Theatres Current Destination	OLE DB Destination	ComponentMetaDataCollection

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	Derived Column Input
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component.

	The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Package element: Staging Import Source

Properties

Name	Value
AreInputColumnsValid	True

Version	7

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
OLE DB Source Error Output		OutputCollection
OLE DB Source Output		OutputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
ParameterMapping	The mappings between the parameters in the SQL command and variables.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection
SqlCommandVariable	The variable that contains the SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: SchDur

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	161
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].ExternalColumns[SchDur]
Length	50
MappedColumnID	0
Name	SchDur
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: SchedPatType

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	165
ID	39
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].Columns[SchedPatType]
Length	255
LineageID	39
MappedColumnID	0
Name	SchedPatType
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: SchedPatType

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	165
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].ExternalColumns[SchedPatType]
Length	255
MappedColumnID	0
Name	SchedPatType
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: SchedType

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	166
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].ExternalColumns[SchedType]
Length	255
MappedColumnID	0
Name	SchedType
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: SchedType

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	166
ID	40
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].Columns[SchedType]
Length	255
LineageID	40
MappedColumnID	0
Name	SchedType
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: ScheduleSeq

Properties

Name	Value
CodePage	0
DataType	DT_I4
Description	

ID	178
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].ExternalColumns[ScheduleSeq]
Length	0
MappedColumnID	0
Name	ScheduleSeq
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: ScheduleSeq

Properties

Name	Value
CodePage	0
ComparisonFlags	0
DataType	DT_I4
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	178
ID	52
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].Columns[ScheduleSeq]
Length	0
LineageID	52
MappedColumnID	0
Name	ScheduleSeq
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: SchEventID

Properties

Name	Value
CodePage	0
DataType	DT_NUMERIC
Description	
ID	172
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].ExternalColumns[SchEventID]
Length	0
MappedColumnID	0

Name	SchEventID
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	10
Scale	0

Package element: SchEventID

Properties

Name	Value
CodePage	0
ComparisonFlags	0
DataType	DT_NUMERIC
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	172
ID	46
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].Columns[SchEventID]
Length	0
LineageID	46
MappedColumnID	0
Name	SchEventID
ObjectType	OT_OUTPUTCOLUMN
Precision	10
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: SchOperatingRoom

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	158
ID	32
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].Columns[SchOperatingRoom]
Length	255
LineageID	32

MappedColumnID	0
Name	SchOperatingRoom
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: SchOperatingRoom

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	158
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].ExternalColumns[SchOperatingRoom]
Length	255
MappedColumnID	0
Name	SchOperatingRoom
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: SchSessionID

Properties

Name	Value
CodePage	0
DataType	DT_NUMERIC
Description	
ID	173
IdentificationString	Staging Import Source.Outputs[OLE DB Source Output].ExternalColumns[SchSessionID]
Length	0
MappedColumnID	0
Name	SchSessionID
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	10
Scale	0
