Package element: SEQ - Capture and analyze query statistics and query plan and text

Properties

Name	Value
CreationName	STOCK:SEQUENCE
DebugMode	False
DelayValidation	False
Description	Sequence Container
Disable	False
DisableEventHandlers	False
ExecutionDuration	0
ExecutionResult	Success
ExecutionStatus	None
FailPackageOnFailure	False
FailParentOnFailure	True
ForcedExecutionValue	0
ForceExecutionResult	None
ForceExecutionValue	False
HasExpressions	False
ID	{5D4817CD-0B0D-4F38-9BD7-6D5FEE0A1D6C}
IsDefaultLocaleID	True
IsolationLevel	Serializable
LocaleID	English (United States)
LoggingMode	Disabled
MaximumErrorCount	0
Name	SEQ - Capture and analyze query statistics and query plan and text
SuspendRequired	False

TransactionOption	Supported

Precedence constraints

Constraint name	Source executable		Destination executable	Evaluation operation	Multiple constraint evaluation	Expression
Constraint 1	FST - Rename Current Snapshot File as Last Snapshot File	->	DFT - Find and save sql text	Constraint		
Constraint 2	FAT - Check Interesting Queries Last Snapshot exists	->	DFT - Create Interesting Queries Upload Batch	Constraint		
Constraint 3	DFT - Find and save sql text	->	DFT - Find and save plan text	Constraint		
Constraint 4	DFT - Find and save plan text	->	SQL - Log stats for Interesting Queries	Expression AndConstraint		@[User::LoggingLevel]>=1
Constraint 5	DFT - Create Interesting Queries Last Snapshot	->	SQL - Log stats for Interesting Queries	Expression AndConstraint		@[User::LoggingLevel]>=1
Constraint 6	DFT - Create Interesting Queries Upload Batch	->	FST - Rename Current Snapshot File as Last Snapshot File	Constraint		
Constraint 7	SQL - Log stats for Interesting Queries	->	SQL - Log stats for sql plan	Constraint		
Constraint 8	SQL - Log stats for sql plan	->	SQL - Log stats for sql text	Constraint		
Constraint 9	FAT - Check Interesting Queries Last Snapshot exists	->	DFT - Create Interesting Queries Last Snapshot	Constraint		

Executables

Name	Description
DFT - Create Interesting Queries Last Snapshot	Data Flow Task
DFT - Create Interesting Queries Upload Batch	Data Flow Task
DFT - Find and save plan text	Data Flow Task
DFT - Find and save sql text	Data Flow Task
FAT - Check Interesting Queries Last Snapshot exists	File Access Task
FST - Rename Current Snapshot File as Last Snapshot File	File System Task
SQL - Log stats for Interesting Queries	Execute SQL Task

SQL - Log stats for sql plan	Execute SQL Task
SQL - Log stats for sql text	Execute SQL Task

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{15DDC5A3-5645-4BAA-BCC8-B0AF18FDE25D}
Description	The OLE DB runtime connection used to access the database.
ID	21
IdentificationString	OLE DB Source.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	13
IdentificationString	OLE DB Source.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	14
IdentificationString	OLE DB Source.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter

Package element: SqlCommandVariable

Properties

Name	Value
ContainsID	False

Description	The variable that contains the SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	16
IdentificationString	OLE DB Source.Properties[SqlCommandVariable]
Name	SqlCommandVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	User::SnapshotQueryStatsQuery

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	Row Count Input 1
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: ParentLogID

Properties

Name	Value
CreationName	
DataType	Int64
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	ParentLogID
Namespace	User
QualifiedName	User::ParentLogID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::ParentLogID]

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional

Name	PipelineInitialization

Package element: RC - Row count from dm_exec_query_stats

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{BA5B06BC-5EC0-47EC-BFE8-036AB26C6A02}
ContactInfo	Row Count;Microsoft Corporation;Microsoft Sql Server 2014; Â© 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;0
Description	Counts the rows in a dataset.

ObjectType	OT_INPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
TruncationRowDisposition	RD_NotUsed
UpstreamComponentName	RFS - Read last snapshot of dm_exec_query_stats
UsageType	UT_READONLY

Package element: NumKeyColumns

Properties

Name	Value
ContainsID	False
Description	Specifies the number of columns in the ordering key.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	199
IdentificationString	MRG - Append last stats on interesting queries.Properties[NumKeyColumns]
Name	NumKeyColumns
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	5

Package element: TreatNullsAsEqual

Properties

Name	Value
ContainsID	False
Description	Indicates whether the null values are treated as equal values.
EncryptionRequired	False
ExpressionType	CPET_NONE

ID	200
IdentificationString	MRG - Append last stats on interesting queries.Properties[TreatNullsAsEqual]
Name	TreatNullsAsEqual
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	True

Package element: Multicast Output 2

Properties

Name	Value
Description	
EndPoint	Derived Column Input
Name	Multicast Output 2
ObjectType	OT_PATH
StartPoint	Multicast Output 2

Package element: Multicast Output 3

Properties

Name	Value
Description	
EndPoint	Union All Input 1
Name	Multicast Output 3
ObjectType	OT_PATH
StartPoint	Multicast Output 3

Package element: Multicast Output 4

Properties

Name	Value
Description	
EndPoint	Sort Input
Name	Multicast Output 4
ObjectType	OT_PATH
StartPoint	Multicast Output 4

Package element: NotableQueryPlan

Properties

Name	Value

CreationName

Version	4

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null	CustomPropertyCollection

	inserted in the destination. If false, columns containing null will have their default values inserted at the destinaton. Applies only if fast load is turned on.	
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value
ContainsID	False
Description	Specifies the mode used to access the database.
EncryptionRequired	False

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection

CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destinaton. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Scale	0

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{6638AF14-9580-4671-8B14-1E28ADAD9B72}
Description	The OLE DB runtime connection used to access the database.
ID	449
IdentificationString	ODD - Upload interesting sql handles.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	439
IdentificationString	ODD - Upload interesting sql handles.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	[snapshots].[notable_query_text]

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	440
IdentificationString	ODD - Upload interesting sql handles.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable

ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	441
IdentificationString	ODD - Upload interesting sql handles.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	Microsoft.DataTransformationServices.Controls.ModalMultilineStringEditor, Microsoft.DataTransformationServices.Controls, Version=12.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91
Value	

Package element: ODS - Get current snapshot of dm_exec_query_stats

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{D1AA3237-CE07-40F9-AA7D-DB75A2552BAC}
ContactInfo	OLE DB Source;Microsoft Corporation;Microsoft Sql Server 2014; Â© 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;7
Description	OLE DB Source
ID	462
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats
IsDefaultLocale	True
LocaleID	English (United States)
Name	ODS - Get current snapshot of dm_exec_query_stats
ObjectType	9
PipelineVersion	0
UsesDispositions	True
ValidateExternalMetadata	True
Version	7

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
OLE DB Source Error Output		OutputCollection
OLE DB Source Output		OutputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
ParameterMapping	The mappings between the parameters in the SQL command and variables.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection
SqlCommandVariable	The variable that contains the SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value
ContainsID	False
Description	Specifies the mode used to access the database.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	470
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Properties[AccessMode]
Name	AccessMode
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	AccessMode
UITypeEditor	
Value	3

Package element: AlwaysUseDefaultCodePage

Properties

Name	Value
ContainsID	False
Description	Forces the use of the DefaultCodePage property value when describing character data.

EncryptionRequired	False
ExpressionType	CPET_NONE
ID	469
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Properties[AlwaysUseDefaultCodePage]

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{15DDC5A3-5645-4BAA-BCC8-B0AF18FDE25D}
Description	The OLE DB runtime connection used to access the database.
ID	472
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	464
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Properties[OpenRowset]

Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	465
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: ParameterMapping

Properties

Name	Value
ContainsID	False
Description	The mappings between the parameters in the SQL command and variables.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	471
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Properties[ParameterMapping]
Name	ParameterMapping
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	466
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	Microsoft.DataTransformationServices.Controls.ModalMultilineStringEditor, Microsoft.DataTransformationServices.Controls, Version=12.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91
Value	

Package element: SqlCommandVariable

Properties

Name	Value
ContainsID	False
Description	The variable that contains the SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	467
IdentificationString	ODS - Get current snapshot of dm_exec_query_stats.Properties[SqlCommandVariable]
Name	SqlCommandVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	User::SnapshotQueryStatsQuery

Package element: OLE DB Destination Error Output

Properties

Name	Value
Description	
EndPoint	Row Count Input 1
Name	OLE DB Destination Error Output
ObjectType	OT_PATH
StartPoint	OLE DB Destination Error Output

Package element: OLE DB Destination Error Output

Properties

Name	Value
Description	
EndPoint	Row Count Input 1
Name	OLE DB Destination Error Output
ObjectType	OT_PATH
StartPoint	OLE DB Destination Error Output

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	Row Count Input 1
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: ParentLogID

Properties

Name	Value
CreationName	
DataType	Int64
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	ParentLogID
Namespace	User
QualifiedName	User::ParentLogID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::ParentLogID]

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	

Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Package element: Process TopN

Properties

Name	Value
Description	
EndPoint	Union All Input 3
Name	Process TopN
ObjectType	OT_PATH
StartPoint	Multicast Output 1

Package element: Process TopN

Properties

Name	Value
Description	
EndPoint	Union All Input 2
Name	Process TopN
ObjectType	OT_PATH
StartPoint	Multicast Output 2

Package element: Raw File Source Output

Properties

Name	Value
Description	
EndPoint	Multicast Input 1
Name	Raw File Source Output
ObjectType	OT_PATH
StartPoint	Raw File Source Output

Package element: Raw File Source Output

Properties

Name	Value
Description	
EndPoint	Conditional Split Input
Name	Raw File Source Output
ObjectType	OT_PATH
StartPoint	Raw File Source Output

Package element: RC - Number of interesting plan handles

Properties

Name	Value

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
CacheDirectory		Variables
CacheWindow		Variables
CollectionCacheFileName	Stores snapshots of dm_exec_requests	Variables
CollectionCacheFileNameOutput	Stores snpashots of dm_exec_requests. This variable is used as temporary cached file name during the upload.	Variables
CollectionCacheFilePrefixPattern	Prefix for files related to dm_exec_requets collection	Variables
CollectionSetUID		Variables
CollectorTypeUID		Variables
ConfigConnectionString		Variables
DaysUntilExpiration		Variables
ExitEventName		Variables
InputParameters		Variables
InstanceID		Variables
InstanceName		Variables
InterestingQueries_HighCpuUsage		Variables
InterestingQueries_HighIoCount		Variables
InterestingQueries_HighMemoryUsage		Variables
InterestingQueries_HighTransactionCount		Variables
InterestingQueries_LargeResultset		Variables
InterestingQueries_LongRunningRequest		Variables
InterestingQueries_LongWaitingRequest		Variables
InterestingQueriesCount		Variables
InterestingQueriesLastSnapshotFileName	Stores the most recent copy of snapshot of dm_exec_query_stats saved from the previous execution of this package.	Variables
InterestingQueriesLastSnapshotFileNameOutput	Stores temporary copy of the most recent snapshot of dm_exec_query_stats	Variables
InterestingQueriesRowCountIn		Variables
InterestingQueriesRowCountOut		Variables
InterestingQueriesSnapshotFileNamePrefixPattern	Prefix for files related to dm_exec_query_stats collection.	Variables
ItemID		Variables
LKUP - Look up query plans on target server	Looks up values in a reference dataset by using exact matching.	ComponentMetaDataCollection
LoggingLevel		Variables
LogID		Variables
Lookup Match Output		PathCollection

Lookup No Match Output		PathCollection
LoopDuration		Variables
LoopEventName		Variables
MDWConnectionString		Variables
ODC - Save known plans to warehouse	Executes an SQL command for each row in a dataset.	ComponentMetaDataCollection
ODS - Get all plan handles without saved plan	OLE DB Source	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
ParentLogID		Variables
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
RC - Identified query plans count	Counts the rows in a dataset.	ComponentMetaDataCollection
RC - Unidentified query plans count	Counts the rows in a dataset.	ComponentMetaDataCollection
RC - Unknown query plans count	Counts the rows in a dataset.	ComponentMetaDataCollection
Row Count Output 1		PathCollection
Row Count Output 1		PathCollection
SnapshotId		Variables
SnapshotQueryStatsQuery		Variables

Package element: LKUP - Look up query plans on target server

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{9345248B-9709-4C04-90C1-0853F8B68EE8}
ContactInfo	Lookup;Microsoft Corporation;Microsoft Sql Server 2014; Â© 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;5
Description	Looks up values in a reference dataset by using exact matching.
ID	2
IdentificationString	LKUP - Look up query plans on target server
IsDefaultLocale	True
LocaleID	English (United States)
Name	LKUP - Look up query plans on target server
ObjectType	12
PipelineVersion	0
UsesDispositions	True
ValidateExternalMetadata	True
Version	6

Elements

Name	Description	Type
CacheType	Specifies the cache type of the lookup table.	CustomPropertyCollection
ConnectionType	Specifies the type of connection used to access the reference dataset.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
Lookup Error Output		OutputCollection
Lookup Input		InputCollection
Lookup Match Output		OutputCollection
Lookup No Match Output	The Lookup output that handles rows with no matching entries in the reference dataset. Use this output when the NoMatchBehavior property is set to "Send rows with no matching entries to the no match output."	OutputCollection
MaxMemoryUsage	Maximum Memory Usage for Reference Cache on a 32 bit platform.	CustomPropertyCollection
MaxMemoryUsage64	Maximum Memory Usage for Reference Cache on a 64 bit platform.	CustomPropertyCollection

NoMatchBehavior	Specifies how the Lookup transformation handles rows without matching entries in the reference data set.	CustomPropertyCollection
NoMatchCachePercentage	Specifies the percentage of the cache that is allocated for rows with no matching entries in the reference dataset.	CustomPropertyCollection
OleDbConnection	Connection manager used to access lookup data.	RuntimeConnectionCollection
ParameterMap	Specifies the list of lineage identifiers that map to the parameters that the SQL statement in the SQLCommand property uses. Entries in the list are separated by semicolons.	CustomPropertyCollection
ReferenceMetadataXml	Indicates whether to reference metadata in an XML format.	CustomPropertyCollection
SqlCommand	Specifies the SQL statement that generates the lookup table.	CustomPropertyCollection
SqlCommandParam	Specifies a SQL statement that uses parameters to generate the lookup table.	CustomPropertyCollection
TreatDuplicateKeysAsError	Determines whether duplicate keys in the reference data should be treated as errors when full cache mode is used.	CustomPropertyCollection

Package element: CacheType

Properties

Name	Value
ContainsID	False
Description	Specifies the cache type of the lookup table.
EncryptionRequired	False

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{6638AF14-9580-4671-8B14-1E28ADAD9B72}
Description	The OLE DB runtime connection used to access the database.
ID	89
IdentificationString	ODS - Get all plan handles without saved plan.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	81
IdentificationString	ODS - Get all plan handles without saved plan.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE

ID	82
IdentificationString	ODS - Get all plan handles without saved plan.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: ParameterMapping

Properties

Name	Value
ContainsID	False
Description	The mappings between the parameters in the SQL command and variables.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	88
IdentificationString	ODS - Get all plan handles without saved plan.Properties[ParameterMapping]
Name	ParameterMapping
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	83
IdentificationString	ODS - Get all plan handles without saved plan.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter

Value	

Package element: SqlCommandVariable

Properties

Name	Value
ContainsID	False
Description	The variable that contains the SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	84
IdentificationString	ODS - Get all plan handles without saved plan.Properties[SqlCommandVariable]
Name	SqlCommandVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	User::SourceSqlQuery

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	Row Count Input 1
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: ParentLogID

Properties

Name	Value
CreationName	
DataType	Int64
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	ParentLogID
Namespace	User
QualifiedName	User::ParentLogID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False

Value	0
VariablePath	\Package.Variables[User::ParentLogID]

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Package element: RC - Identified query plans count

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{BA5B06BC-5EC0-47EC-BFE8-036AB26C6A02}
ContactInfo	Row Count;Microsoft Corporation;Microsoft Sql Server 2014; Â© 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;0

InterestingQueries_HighMemoryUsage		Variables
InterestingQueries_HighTransactionCount		Variables
InterestingQueries_LargeResultset		Variables
InterestingQueries_LongRunningRequest		Variables
InterestingQueries_LongWaitingRequest		Variables
InterestingQueriesCount		Variables
InterestingQueriesLastSnapshotFileName	Stores the most recent copy of snapshot of dm_exec_query_stats saved from the previous execution of this package.	Variables
InterestingQueriesLastSnapshotFileNameOutput	Stores temporary copy of the most recent snapshot of dm_exec_query_stats	Variables

InterestingQueriesRowCountIn		Variables
InterestingQueriesRowCountOut		Variables
InterestingQueriesSnapshotFileNamePrefixPattern	Prefix for files related to dm_exec_query_stats collection.	Variables
ItemID		Variables
LKUP - Look up query text on target server	Looks up values in a reference dataset by using exact matching.	ComponentMetaDataCollection
LoggingLevel		Variables
LogID		Variables
Lookup Match Output		PathCollection
Lookup No Match Output		PathCollection
LoopDuration		Variables
LoopEventName		Variables
MDWConnectionString		Variables
ODS - Get all sql handles without saved sql text	OLE DB Source	ComponentMetaDataCollection
ODS - Save query text to warehouse	Executes an SQL command for each row in a dataset.	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
ParentLogID		Variables
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
RC - Identified query text count	Counts the rows in a dataset.	ComponentMetaDataCollection
RC - Unidentified query text count	Counts the rows in a dataset.	ComponentMetaDataCollection
RC - Unknown query text count	Counts the rows in a dataset.	ComponentMetaDataCollection
Row Count Output 1		PathCollection
Row Count Output 1		PathCollection

Package element: LKUP - Look up query text on target server

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{9345248B-9709-4C04-90C1-0853F8B68EE8}
ContactInfo	Lookup;Microsoft Corporation;Microsoft Sql Server 2014; Â© 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;5
Description	Looks up values in a reference dataset by using exact matching.
ID	2
IdentificationString	LKUP - Look up query text on target server
IsDefaultLocale	True
LocaleID	English (United States)
Name	LKUP - Look up query text on target server
ObjectType	12
PipelineVersion	0
UsesDispositions	True
ValidateExternalMetadata	True
Version	6

Elements

Name	Description	Type
CacheType	Specifies the cache type of the lookup table.	CustomPropertyCollection
ConnectionType	Specifies the type of connection used to access the reference dataset.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
Lookup Error Output		OutputCollection
Lookup Input		InputCollection
Lookup Match Output		OutputCollection
Lookup No Match Output	The Lookup output that handles rows with no matching entries in the reference dataset. Use this output when the NoMatchBehavior property is set to "Send rows with no matching entries to the no match output."	OutputCollection
MaxMemoryUsage	Maximum Memory Usage for Reference Cache on a 32 bit platform.	CustomPropertyCollection
MaxMemoryUsage64	Maximum Memory Usage for Reference Cache on a 64 bit platform.	CustomPropertyCollection
NoMatchBehavior	Specifies how the Lookup transformation handles rows without matching entries in the reference data set.	CustomPropertyCollection
NoMatchCachePercentage	Specifies the percentage of the cache that is allocated for rows with no matching entries in the reference dataset.	CustomPropertyCollection
OleDbConnection	Connection manager used to access lookup data.	RuntimeConnectionCollection
ParameterMap	Specifies the list of lineage identifiers that map to the parameters that the SQL statement in the SQLCommand property uses. Entries in the list are separated by semicolons.	CustomPropertyCollection
ReferenceMetadataXml	Indicates whether to reference metadata in an XML format.	CustomPropertyCollection
SqlCommand	Specifies the SQL statement that generates the lookup table.	CustomPropertyCollection
SqlCommandParam	Specifies a SQL statement that uses parameters to generate the lookup table.	CustomPropertyCollection
TreatDuplicateKeysAsError	Determines whether duplicate keys in the reference data should be treated as errors when full cache mode is used.	CustomPropertyCollection

Package element: CacheType

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{92804B88-CB2F-4FEE-8EFF-64901F67CBBB}
Description	Connection manager used to access lookup data.
ID	15

IdentificationString	LKUP - Look up query text on target server.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: ParameterMap

Properties

Name	Value
ContainsID	True
Description	Specifies the list of lineage identifiers that map to the parameters that the SQL statement in the SQLCommand property uses. Entries in the list are separated by semicolons.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	12
IdentificationString	LKUP - Look up query text on target server.Properties[ParameterMap]
Name	ParameterMap
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	#46;

Package element: ReferenceMetadataXml

Properties

Name	Value
ContainsID	False
Description	Indicates whether to reference metadata in an XML format.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	11
IdentificationString	LKUP - Look up query text on target server.Properties[ReferenceMetadataXml]
Name	ReferenceMetadataXml
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter

IsDefaultLocaleID	True
IsolationLevel	Serializable
IsStoredProcedure	False
LocaleID	English (United States)
LoggingMode	UseParentSetting
MaximumErrorCount	0
Name	SQL - Log stats for Interesting Queries
ResultSetType	1
SqlStatementSource	{ call dbo.sp_syscollector_event_onstatsupdate (?, N'query_stats upload', ?, ?, NULL, 0) }
SqlStatementSourceType	Direct Input
SuspendRequired	False
TimeOut	0
TransactionOption	Supported
TypeConversionMode	2
Version	0

Parameter mapping

Variable name	Direction	Data type	Parameter name	Parameter size
User::LogID	Input	20	0	-1
User::InterestingQueries RowCountIn	Input	3	1	-1
User::InterestingQueries RowCountOut	Input	3	2	-1

Elements

Name	Description	Type
CacheDirectory		Variables
CacheWindow		Variables
CollectionCacheFileName	Stores snapshots of dm_exec_requests	Variables
CollectionCacheFileNameOutput	Stores snpashots of dm_exec_requests. This variable is used as temporary cached file name during the upload.	Variables
CollectionCacheFilePrefixPattern	Prefix for files related to dm_exec_requets collection	Variables
CollectionSetUID		Variables
CollectorTypeUID		Variables
ConfigConnectionString		Variables
DaysUntilExpiration		Variables
ExecuteSQLExecutingQuery	Provides information about executing an SQL query.	LogEntryInfos
ExitEventName		Variables
InputParameters		Variables
InstanceID		Variables
InstanceName		Variables
InterestingQueries_HighCpuUsage		Variables
InterestingQueries_HighIoCount		Variables
InterestingQueries_HighMemoryUsage		Variables
InterestingQueries_HighTransactionCount		Variables
InterestingQueries_LargeResultset		Variables
InterestingQueries_LongRunningRequest		Variables
InterestingQueries_LongWaitingRequest		Variables
InterestingQueriesCount		Variables
InterestingQueriesLastSnapshotFileName	Stores the most recent copy of snapshot of dm_exec_query_stats saved from the previous execution of this package.	Variables
InterestingQueriesLastSnapshotFileNameOutput	Stores temporary copy of the most recent snapshot of dm_exec_query_stats	Variables
InterestingQueriesRowCountIn		Variables
InterestingQueriesRowCountOut		Variables

InterestingQueriesSnapshotFileNamePrefixPattern	Prefix for files related to dm_exec_query_stats collection.	Variables
ItemID		Variables
LoggingLevel		Variables
LogID		Variables
LoopDuration		Variables
LoopEventName		Variables
MDWConnectionString		Variables
ParentLogID		Variables
SnapshotId		Variables
SnapshotQueryStatsQuery		Variables
SourceId		Variables
SqlPlanRowCountError		Variables
SqlPlanRowCountIn		Variables
SqlPlanRowCountOut		Variables
SqlPlanUpdateRowCountError		Variables
SqlPlanUpdateRowCountIn		Variables
SqlPlanUpdateRowCountOut		Variables
SqlTextRowCountError		Variables
SqlTextRowCountIn		Variables
SqlTextRowCountOut		Variables
SqlTextUpdateRowCountError		Variables
SqlTextUpdateRowCountIn		Variables
SqlTextUpdateRowCountOut		Variables
TargetConnectionString		Variables
TopThreshold		Variables

Package element: TopThreshold

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	TopThreshold
Namespace	User
QualifiedName	User::TopThreshold
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	5
VariablePath	\Package.Variables[User::TopThreshold]

Package element: Diagnostic

Properties

Name	Value
CreationName	
Description	Logs package diagnostics information, e.g. maximum concurrent executables
FrequencyHint	Consistent
Name	Diagnostic

Package element: DiagnosticEx

Properties

Name	Value
CreationName	
Description	Logs more information on package execution with XML format
FrequencyHint	Consistent
Name	DiagnosticEx

Package element: Constraint

Properties

Name	Value
ConstrainedExecutable	CWM - Remove Upload Snapshots Older Than CacheWindow
CreationName	
Description	
EvalOp	Constraint
EvaluatesTrue	True
Expression	
ID	{6FDD2D34-4BAD-42B5-9E71-E135532FB590}
LogicalAnd	True
Name	Constraint
PrecedenceExecutable	SEQ - Rename Collection Cache File
Value	Success

Package element: Constraint 12

Properties

Name	Value
ConstrainedExecutable	SEQ - Rename Collection Cache File
CreationName	
Description	
EvalOp	Constraint
EvaluatesTrue	True
Expression

DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True

Name	ItemID
Namespace	User
QualifiedName	User::ItemID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	100
VariablePath	\Package.Variables[User::ItemID]

Package element: LoggingLevel

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	LoggingLevel
Namespace	User
QualifiedName	User::LoggingLevel
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	2
VariablePath	\Package.Variables[User::LoggingLevel]

Package element: LogID

Properties

Name	Value
CreationName	
DataType	Int64
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	LogID
Namespace	User
QualifiedName	User::LogID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False

Value	0
VariablePath	\Package.Variables[User::LogID]

Package element: LoopDuration

Properties

Name	Value
CreationName	
DataType	Int64
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	LoopDuration
Namespace	User
QualifiedName	User::LoopDuration
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::LoopDuration]

Package element: LoopEventName

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	LoopEventName
Namespace	User
QualifiedName	User::LoopEventName
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	LOOPEVENT
VariablePath	\Package.Variables[User::LoopEventName]

Package element: MDWConnectionString

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	MDWConnectionString
Namespace	User
QualifiedName	User::MDWConnectionString
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	Provider=SQLNCLI11;Data Source=(local);Integrated Security=SSPI;Initial Catalog=MDW;APP=SQL Server Data Collector
VariablePath	\Package.Variables[User::MDWConnectionString]

Package element: ParentLogID

Properties

Name	Value
CreationName	
DataType	Int64
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	ParentLogID
Namespace	User
QualifiedName	User::ParentLogID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::ParentLogID]

Package element: SnapshotId

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False

Expression	
IncludeInDebugDump	True
Name	SnapshotId
Namespace	User
QualifiedName	User::SnapshotId
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	200
VariablePath	\Package.Variables[User::SnapshotId]

Package element: SnapshotQueryStatsQuery

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	True
Expression	"EXEC [msdb].[dbo].[sp_syscollector_snapshot_dm_exec_query_stats] " + (DT_WSTR,10) (@[User::ItemID])
IncludeInDebugDump	False
Name	SnapshotQueryStatsQuery
Namespace	User
QualifiedName	User::SnapshotQueryStatsQuery
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	EXEC [msdb].[dbo].[sp_syscollector_snapshot_dm_exec_query_stats] 100
VariablePath	\Package.Variables[User::SnapshotQueryStatsQuery]

Package element: SourceId

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	SourceId
Namespace	User
QualifiedName	User::SourceId

RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	1
VariablePath	\Package.Variables[User::SourceId]

Package element: TargetConnectionString

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	TargetConnectionString
Namespace	User
QualifiedName	User::TargetConnectionString
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	Provider=SQLNCLI11;Initial Catalog=master;Data Source=(local);Integrated Security=SSPI;APP=SQL Server Data Collector
VariablePath	\Package.Variables[User::TargetConnectionString]

Package element: TopThreshold

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	TopThreshold
Namespace	User
QualifiedName	User::TopThreshold
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	5
VariablePath	\Package.Variables[User::TopThreshold]
