Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection

CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

TransactionOption	Supported

Elements

Name	Description	Type
Add End Date	Creates new column values by applying expressions to transformation input columns. Create new columns or overwrite existing ones. For example, concatenate the values from the 'first name' and 'last name' column to make a 'full name' column.	ComponentMetaDataCollection
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Derived Column Output		PathCollection
OLE DB Destination	OLE DB Destination	ComponentMetaDataCollection
OLE DB Source	OLE DB Source	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
OLE DB Source Error Output		OutputCollection
OLE DB Source Output		OutputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
ParameterMapping	The mappings between the parameters in the SQL command and variables.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection
SqlCommandVariable	The variable that contains the SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Package element: Escort

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	479
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[Escort]
Length	101
MappedColumnID	0
Name	Escort
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: EventConsultantSurgeon

Properties

Name	Value
CodePage	1252

DataType	DT_STR
Description	
ID	518
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[EventConsultantSurgeon]
Length	101
MappedColumnID	0
Name	EventConsultantSurgeon
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: EventConsultantSurgeon

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	518
ID	391
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[EventConsultantSurgeon]
Length	101
LineageID	391
MappedColumnID	0
Name	EventConsultantSurgeon
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: EventOperatingSurgeon

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	517
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[EventOperatingSurgeon]

Length	101
MappedColumnID	0
Name	EventOperatingSurgeon
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: EventOperatingSurgeon

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	517
ID	390
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[EventOperatingSurgeon]
Length	101
LineageID	390
MappedColumnID	0
Name	EventOperatingSurgeon
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: FIN

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	427
ID	300
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[FIN]

Length	101
LineageID	300
MappedColumnID	0
Name	FIN
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: FIN

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description

SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: IntendedPrimaryProc

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	451
ID	324
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[IntendedPrimaryProc]
Length	255
LineageID	324
MappedColumnID	0
Name	IntendedPrimaryProc
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: IntendedPrimaryProc

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	451
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[IntendedPrimaryProc]
Length	255
MappedColumnID	0
Name	IntendedPrimaryProc
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: Laser Operator

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	487
ID	360
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[Laser Operator]
Length	101
LineageID	360
MappedColumnID	0
Name	Laser Operator
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: Laser Operator

Properties

Name	Value
CodePage	1252

DataType	DT_STR
Description	
ID	487
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[Laser Operator]
Length	101
MappedColumnID	0
Name	Laser Operator
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: Last_Min_CancelledFlag

Properties

Name	Value
CodePage	1252
DataType	DT_STR
Description	
ID	536
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[Last_Min_CancelledFlag]
Length	10
MappedColumnID	0
Name	Last_Min_CancelledFlag
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: Last_Min_CancelledFlag

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description

IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[Last_Min_CancelledFlag]
Length	10
LineageID	409
MappedColumnID	0
Name	Last_Min_CancelledFlag

ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: Late Start Reason

Properties

Name	Value
CodePage	0
ComparisonFlags	0
DataType	DT_WSTR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	519
ID	392
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[Late Start Reason]
Length	2000
LineageID	392
MappedColumnID	0
Name	Late Start Reason
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_FailComponent

Package element: Late Start Reason

Properties

Name	Value
CodePage	0
DataType	DT_WSTR
Description	
ID	519
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].ExternalColumns[Late Start Reason]
Length	2000
MappedColumnID	0
Name	Late Start Reason
ObjectType	OT_EXTERNALMETADATACOLUMN

Precision	0
Scale	0

Package element: List Owner

Properties

Name	Value
CodePage	1252
ComparisonFlags	0
DataType	DT_STR
Description	
ErrorOrTruncationOperation	Conversion
ErrorRowDisposition	RD_FailComponent
ExternalMetadataColumnID	533
ID	406
IdentificationString	OLE DB Source.Outputs[OLE DB Source Output].Columns[List Owner]
Length	10

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Derived Column Output		PathCollection
Get Start Date	Creates new column values by applying expressions to transformation input columns. Create new columns or overwrite existing ones. For example, concatenate the values from the 'first name' and 'last name' column to make a 'full name' column.	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
Theatres CAN Recs Current Destination	OLE DB Destination	ComponentMetaDataCollection
Theatres Cancelled Recs Import Source	OLE DB Source	ComponentMetaDataCollection

Package element: OLE DB Source Output

Properties

Name	Value
Description	
EndPoint	Derived Column Input
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value

CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Package element: Theatres CAN Recs Current Destination

Properties

Name	Value

Version	4

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be	CustomPropertyCollection

	copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
OLE DB Source Error Output		OutputCollection
OLE DB Source Output		OutputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
ParameterMapping	The mappings between the parameters in the SQL command and variables.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection
SqlCommandVariable	The variable that contains the SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Elements

Name	Description	Type
Add End Date	Creates new column values by applying expressions to transformation input columns. Create new columns or overwrite existing ones. For example, concatenate the values from the 'first name' and 'last name' column to make a 'full name' column.	ComponentMetaDataCollection
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
Derived Column Output		PathCollection
OLE DB Source	OLE DB Source	ComponentMetaDataCollection
OLE DB Source Output		PathCollection
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
Theatres CAN History Destination	OLE DB Destination	ComponentMetaDataCollection

Package element: Add End Date

Name	Value
Description	
EndPoint	Derived Column Input
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Package element: Theatres CAN History Destination

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Connection managers

Name	Description
ConfigConnection	Connection used to get information about collection configuration and for logging purposes.
MdwConnection	Connection used to upload collected data to a warehouse.
TargetConnection	Connection used to get information from the monitored (target) instance.

Event handlers

Extended properties

Executables

Name	Description
CWM - Delete Old Cache Files	Cache Window Maintainance Task
FEF - For Each Collected Cache File Remaining, Try to Upload	Foreach Loop Container
Sequence Container	Sequence Container
SQL - Create snapshot ID in MDW	Execute SQL Task
SQL - Register collection set to MDW	Execute SQL Task

Log entry information

Name	Description
Diagnostic	Logs package diagnostics information, e.g. maximum concurrent executables
DiagnosticEx	Logs more information on package execution with XML format

Log providers

Precedence constraints

SuspendRequired	False
TransactionOption	Supported

Precedence constraints

Constraint name	Source executable		Destination executable	Evaluation operation	Multiple constraint evaluation	Expression
Constraint 1	DFT - Bulk Insert Collected data into MDW	->	SQL - Log Package Stats	Expression AndConstraint		@[User::LoggingLevel] >= 1
Constraint 2	DFT - Bulk Insert Collected data into MDW	->	FST - Cleanup	Constraint		
Constraint 3	DFT - Update perf_counters_instances table with newly discovered instances	->	DFT - Bulk Insert Collected data into MDW	Constraint		

Executables

Name	Description
DFT - Bulk Insert Collected data into MDW	Data Flow Task
DFT - Update perf_counters_instances table with newly discovered instances	Data Flow Task
FST - Cleanup	File System Task
SQL - Log Package Stats	Execute SQL Task

Output column mappings

Source column	Data type	Length	Precision	Scale	Code page		Destination column	Data type	Length	Precision	Scale	Code page
[DRV - Add snapshot id].snapshot_id	DT_I4	0	0	0	0	->	[].[snapshot_id]	DT_I4	0	0	0	0
[RAW - Read current tempoary storage].raw_value_second	DT_I8	0	0	0	0	->	[].[raw_value_second]	DT_I8	0	0	0	0

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
CacheDirectory		Variables
CacheFileName		Variables
CacheFileToUpload		Variables
CacheOutput		Variables
CacheUploadFilesPrefixPatter n		Variables
CacheWindow		Variables
CollectionSetUID		Variables
CollectorTypeUID		Variables
ConfigConnectionString		Variables
DaysUntilExpiration		Variables
Derived Column Output		PathCollection

DRV - Add snapshot id	Updates column values using expressions	ComponentMetaDataCollection
ExitEventName		Variables
Failed Rows		PathCollection
InputParameters		Variables
InstanceID		Variables
InstanceName		Variables
ItemID		Variables
LKU - Lookup into performance_counter_instances to obtain performance_counter_id for all counter paths that get inserted	Looks up values in a reference dataset by using exact matching.	ComponentMetaDataCollection
LoggingLevel		Variables
LogID		Variables
Lookup Match Output		PathCollection
LoopDuration		Variables
LoopEventName		Variables
MDWConnectionString		Variables
ODB - Fast upload data to performance_counter_values	OLE DB Destination	ComponentMetaDataCollection
ParentLogID		Variables
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
RAW - Read current tempoary storage	Extracts data from a raw file.	ComponentMetaDataCollection
Raw File Source Output		PathCollection
RC - Number of rows failed to insert	Counts the rows in a dataset.	ComponentMetaDataCollection
RC - Number of rows from cache	Counts the rows in a dataset.	ComponentMetaDataCollection
RC - Number of rows inserted	Counts the rows in a dataset.	ComponentMetaDataCollection
Row Count Output 1		PathCollection
Row Count Output 1		PathCollection
RowCountError		Variables
RowCountIn		Variables
RowCountOut		Variables
RowCountOutFinal		Variables

Package element: LKU - Lookup into performance_counter_instances to obtain performance_counter_id for all counter paths that get inserted

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{EDED6488-9C19-496D-9F1D-99E1DB55AF77}
ContactInfo	Lookup;Microsoft Corporation;Microsoft SqlServer 2015; (C) 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;4
Description	Looks up values in a reference dataset by using exact matching.
ID	15
IdentificationString	LKU - Lookup into performance_counter_instances to obtain performance_counter_id for all counter paths that get inserted
IsDefaultLocale	True
LocaleID	English (United States)
Name	LKU - Lookup into performance_counter_instances to obtain performance_counter_id for all counter paths that get inserted
ObjectType	12
PipelineVersion	0
UsesDispositions	True
ValidateExternalMetadata	True
Version	6

Elements

Name	Description	Type
CacheType	Specifies the cache type of the lookup table.	CustomPropertyCollection
ConnectionType	Specifies the type of connection used to access the reference dataset.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
Lookup Error Output		OutputCollection
Lookup Input		InputCollection
Lookup Match Output		OutputCollection
Lookup No Match Output	The Lookup output that handles rows with no matching entries in the reference dataset. Use this output when the NoMatchBehavior property is set to "Send rows with no matching entries to the no match output."	OutputCollection
MaxMemoryUsage	Maximum Memory Usage for Reference Cache on a 32 bit platform.	CustomPropertyCollection
MaxMemoryUsage64	Maximum Memory Usage for Reference Cache on a 64 bit platform.	CustomPropertyCollection
NoMatchBehavior	Specifies how the Lookup transformation handles rows without matching entries in the reference data set.	CustomPropertyCollection
NoMatchCachePercentage	Specifies the percentage of the cache that is allocated for rows with no matching entries in the reference dataset.	CustomPropertyCollection
OleDbConnection	Connection manager used to access lookup data.	RuntimeConnectionCollection
ParameterMap	Specifies the list of lineage identifiers that map to the parameters that the SQL statement in the SQLCommand property uses. Entries in the list are separated by semicolons.	CustomPropertyCollection
ReferenceMetadataXml	Indicates whether to reference metadata in an XML format.	CustomPropertyCollection
SqlCommand	Specifies the SQL statement that generates the lookup table.	CustomPropertyCollection
SqlCommandParam	Specifies a SQL statement that uses parameters to generate the lookup table.	CustomPropertyCollection
TreatDuplicateKeysAsError	Determines whether duplicate keys in the reference data should be treated as errors when full cache mode is used.	CustomPropertyCollection

Package element: CacheType

Version	4

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destinaton. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

TruncationRowDisposition	RD_NotUsed

Package element: VariableName

Properties

Name	Value
ContainsID	False
Description	Specifies the variable to hold the row count.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	93
IdentificationString	RC - Number of rows failed to insert.Properties[VariableName]
Name	VariableName
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	User::RowCountError

Package element: RC - Number of rows from cache

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{A5CACDE5-7E68-46E3-82D0-583132BF7538}
ContactInfo	Row Count;Microsoft Corporation;Microsoft SqlServer 2015; (C) 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;0
Description	Counts the rows in a dataset.
ID	96
IdentificationString	RC - Number of rows from cache
IsDefaultLocale	True
LocaleID	English (United States)
Name	RC - Number of rows from cache
ObjectType	12
PipelineVersion	0

MaximumErrorCount	0
Name	DFT - Update perf_counters_instances table with newly discovered instances
RunInOptimizedMode	True
SuspendRequired	False
TransactionOption	Supported

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
CacheDirectory		Variables
CacheFileName		Variables
CacheFileToUpload		Variables
CacheOutput		Variables
CacheUploadFilesPrefixPattern		Variables
CacheWindow		Variables
CollectionSetUID		Variables
CollectorTypeUID		Variables
ConfigConnectionString		Variables
DaysUntilExpiration		Variables
ExitEventName		Variables
InputParameters		Variables
InstanceID		Variables
InstanceName		Variables
ItemID		Variables
LoggingLevel		Variables
LogID		Variables
LoopDuration		Variables
LoopEventName		Variables
MDWConnectionString		Variables
ODB - Fast upload data to performance_counters_instances for the new instance path-s that we discovered (together with thier type)	OLE DB Destination	ComponentMetaDataCollection
ParentLogID		Variables
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos

PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
RAW - Read current tempoary storage - purpose - obtain counter paths	Extracts data from a raw file.	ComponentMetaDataCollection
Raw File Source Output		PathCollection
RowCountError		Variables
RowCountIn		Variables
RowCountOut		Variables
RowCountOutFinal		Variables
SnapshotID		Variables
SourceID		Variables
TargetConnectionString		Variables

Package element: ODB - Fast upload data to performance_counters_instances for the new instance path-s that we discovered (together with thier type)

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{7B729B0A-4EA5-4A0D-871A-B6E7618E9CFB}
ContactInfo	OLE DB Destination;Microsoft Corporation;Microsoft SqlServer 2015; (C) 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;4
Description	OLE DB Destination
ID	2
IdentificationString	ODB - Fast upload data to performance_counters_instances for the new instance path-s that we discovered (together with thier type)
IsDefaultLocale	False
LocaleID	English (United States)
Name	ODB - Fast upload data to performance_counters_instances for the new instance path-s that we discovered (together with thier type)
ObjectType	10
PipelineVersion	0
UsesDispositions	True
ValidateExternalMetadata	False
Version	4

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection

AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destinaton. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value

CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Connection managers

Name	Description
ConfigConnection	Connection used to get information about collection configuration and for logging purposes.

MdwConnection	Connection used to upload collected data to a warehouse.
TargetConnection	Connection used to get information from the monitored (target) instance.

Event handlers

Extended properties

Executables

Name	Description
LOOP - Query the query statitics DMV at collection frequency	Foreach Loop Container

Log entry information

Name	Description
Diagnostic	Logs package diagnostics information, e.g. maximum concurrent executables
DiagnosticEx	Logs more information on package execution with XML format

Log providers

MDWConnectionString		Variables
ODS - Get snapshot of dm_exec_requests	OLE DB Source	ComponentMetaDataCollection
OLE DB Source Error Output		PathCollection
OLE DB Source Output		PathCollection
ParentLogID		Variables
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
RFD - Write data to a cache	Loads raw data into a file.	ComponentMetaDataCollection
Row Count Output 1		PathCollection
SnapshotExecRequestQuery		Variables
SyncRoot		Variables
TargetConnectionString		Variables

LocaleID	English (United States)
Name	ODS - Get snapshot of dm_exec_requests
ObjectType	9
PipelineVersion	0
UsesDispositions	True
ValidateExternalMetadata	True
Version	7

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
OLE DB Source Error Output		OutputCollection
OLE DB Source Output		OutputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
ParameterMapping	The mappings between the parameters in the SQL command and variables.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection
SqlCommandVariable	The variable that contains the SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Package element: OleDbConnection

Properties

Name	Value
ConnectionManager	
ConnectionManagerID	{1906A00E-7676-4664-9159-0B790DF483C2}
Description	The OLE DB runtime connection used to access the database.
ID	20
IdentificationString	ODS - Get snapshot of dm_exec_requests.Connections[OleDbConnection]
Name	OleDbConnection
ObjectType	OT_RUNTIMECONNECTION

Package element: OpenRowset

Properties

Name	Value
ContainsID	False
Description	Specifies the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	12
IdentificationString	ODS - Get snapshot of dm_exec_requests.Properties[OpenRowset]
Name	OpenRowset
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	

Value

Package element: OpenRowsetVariable

Properties

Name	Value
ContainsID	False
Description	Specifies the variable that contains the name of the database object used to open a rowset.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	13
IdentificationString	ODS - Get snapshot of dm_exec_requests.Properties[OpenRowsetVariable]
Name	OpenRowsetVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: ParameterMapping

Properties

Name	Value
ContainsID	False
Description	The mappings between the parameters in the SQL command and variables.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	19
IdentificationString	ODS - Get snapshot of dm_exec_requests.Properties[ParameterMapping]
Name	ParameterMapping
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	

Package element: SqlCommand

Properties

Name	Value
ContainsID	False
Description	The SQL command to be executed.
EncryptionRequired	False

ExpressionType	CPET_NONE
ID	14
IdentificationString	ODS - Get snapshot of dm_exec_requests.Properties[SqlCommand]
Name	SqlCommand
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	Microsoft.DataTransformationServices.Controls.ModalMultilineStringEditor, Microsoft.DataTransformationServices.Controls, Version=12.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91
Value	

Package element: SqlCommandVariable

Properties

Name	Value
ContainsID	False
Description	The variable that contains the SQL command to be executed.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	15
IdentificationString	ODS - Get snapshot of dm_exec_requests.Properties[SqlCommandVariable]
Name	SqlCommandVariable
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	User::SnapshotExecRequestQuery

Package element: OLE DB Source Error Output

Properties

Name	Value
Description	
EndPoint	Row Count Input 1
Name	OLE DB Source Error Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Error Output

Package element: OLE DB Source Output

Properties

Name	Value
Description	

EndPoint	Row Count Input 1
Name	OLE DB Source Output
ObjectType	OT_PATH
StartPoint	OLE DB Source Output

Package element: ParentLogID

Properties

Name	Value
CreationName	
DataType	Int64
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	ParentLogID
Namespace	User
QualifiedName	User::ParentLogID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::ParentLogID]

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Package element: RFD - Write data to a cache

Properties

Name	Value
AreInputColumnsValid	True
ComponentClassID	{F84A449B-F8ED-483A-BD9F-9337E8CAD27E}
ContactInfo	Loads raw data into a file.;Microsoft Corporation;Microsoft Sql Server 2014; Â© 2014 Microsoft Corporation; All Rights Reserved; http://www.microsoft.com/sql/support;2
Description	Loads raw data into a file.
ID	181
IdentificationString	RFD - Write data to a cache
IsDefaultLocale	True
LocaleID	English (United States)
Name	RFD - Write data to a cache
ObjectType	10
PipelineVersion	0

UsesDispositions	False
ValidateExternalMetadata	False
Version	2

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the file.	CustomPropertyCollection
FileName	Output file name	CustomPropertyCollection
FileNameVariable	Name of the variable that contains the file name	CustomPropertyCollection
Raw File Destination Input		InputCollection
WriteOption	Indicates what option is used to write to the file.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value
ContainsID	False
Description	Specifies the mode used to access the file.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	182
IdentificationString	RFD - Write data to a cache.Properties[AccessMode]
Name	AccessMode
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	AccessMode
UITypeEditor	
Value	1

Package element: FileName

Properties

Name	Value
ContainsID	False
Description	Output file name
EncryptionRequired	False

Connection managers

Name	Description
ConfigConnection	Connection used to get information about collection

	configuration and for logging purposes.
ConfigConnection2	
MdwConnection	Connection used to upload collected data to a warehouse.
TargetConnection	Connection used to get information from the monitored (target) instance.

Event handlers

Extended properties

Executables

Name	Description
CWM - Remove Upload Snapshots Older Than CacheWindow	Cache Window Maintainance Task
FAT - Check Cache File Exists	File Access Task
FEF - For each collected cache file try upload	Foreach Loop Container
SEQ - Capture and analyze query statistics and query plan and text	Sequence Container
SEQ - Rename Collection Cache File	Sequence Container
SQL - Get SnapshotId	Execute SQL Task
SQL - Get SourceId	Execute SQL Task

Log entry information

Name	Description
Diagnostic	Logs package diagnostics information, e.g. maximum concurrent executables
DiagnosticEx	Logs more information on package execution with XML format

Log providers

Precedence constraints

Name	Description

Description	
EvalOp	Constraint
EvaluatesTrue	True
Expression	
ID	{FC05D77F-6096-43D9-A97D-6DD93198E115}
LogicalAnd	True
Name	Constraint 1
PrecedenceExecutable	SQL - Log Package Iteration
Value	Completion

Package element: Constraint 2

Properties

Name	Value
ConstrainedExecutable	FST - Delete uploaded cache file
CreationName	
Description	
EvalOp	Constraint
EvaluatesTrue	True
Expression	
ID	{ABD0C1A0-A52B-4AB3-BD5A-6CF3F23AD1EA}

LogicalAnd	True
Name	Constraint 2
PrecedenceExecutable	DFT - Upload collection snapshot
Value	Success

Package element: CurrentCollectionCacheFileName

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	CurrentCollectionCacheFileName
Namespace	User
QualifiedName	User::CurrentCollectionCacheFileName
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	C:\Users\macies\AppData\Local\Temp\ecodePerfWH\MACIES4_MSSQL.1_{{2DC02BD6-E230-4C05-8516-4E8C0EF21F95}}_100_QueryActivity.cache
VariablePath	\Package\FEF - For each collected cache file try upload.Variables[User::CurrentCollectionCacheFileName]

Package element: DaysUntilExpiration

Properties

Name	Value
CreationName	
DataType	Int16
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	DaysUntilExpiration
Namespace	User
QualifiedName	User::DaysUntilExpiration
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::DaysUntilExpiration]

Package element: DFT - Upload collection snapshot

Properties

Name	Value
[DRV - Add snapshot_id column].[Derived Column Output].[snapshot_id].[FriendlyExpression]	@[User::SnapshotId]
ApartmentThreaded	False
AutoGenerateIDForNewObjects	True
BLOBTempStoragePath	
BufferTempStoragePath	
CreationName	SSIS.Pipeline.4
DebugMode	False
DefaultBufferMaxRows	10000
DefaultBufferSize	10485760
DelayValidation	False
Description	Data Flow Task
Disable	False
DisableEventHandlers	False
EnableCacheUpdate	True
EnableDisconnectedColumns	False
EngineThreads	10
ExecutionDuration	0
ExecutionResult	Success
ExecutionStatus	None
FailPackageOnFailure	False
FailParentOnFailure	True
ForcedExecutionValue	0
ForceExecutionResult	None
ForceExecutionValue	False
HasExpressions	False
HostType	Task
ID	{FE775FB9-E8B7-4171-9DFB-544E7CCA7809}
IsDefaultLocaleID	True
IsolationLevel	Serializable
IsSavingXml	False
LocaleID	English (United States)
LoggingMode	UseParentSetting
MaximumErrorCount	0
Name	DFT - Upload collection snapshot
RunInOptimizedMode	True
SuspendRequired	False
TransactionOption	Supported

Elements

Name	Description	Type
BufferSizeTuning	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.	LogEntryInfos
CacheDirectory		Variables
CacheWindow		Variables
CollectionCacheFileName	Stores snapshots of dm_exec_requests	Variables
CollectionCacheFileNameOutput	Stores snpashots of dm_exec_requests. This variable is used as temporary cached file name during the upload.	Variables
CollectionCacheFilePrefixPattern	Prefix for files related to dm_exec_requets collection	Variables
CollectionSetUID		Variables
CollectorTypeUID		Variables
ConfigConnectionString		Variables
CurrentCollectionCacheFileName		Variables
DaysUntilExpiration		Variables
Derived Column Output		PathCollection
DRV - Add snapshot_id column	Updates column values using expressions	ComponentMetaDataCollection
ExitEventName		Variables
InputParameters		Variables
InstanceID		Variables
InstanceName		Variables
InterestingQueries_HighCpuUsage		Variables
InterestingQueries_HighIoCount		Variables
InterestingQueries_HighMemoryUsage		Variables
InterestingQueries_HighTransactionCount		Variables
InterestingQueries_LargeResultset		Variables
InterestingQueries_LongRunningRequest		Variables
InterestingQueries_LongWaitingRequest		Variables
InterestingQueriesCount		Variables
InterestingQueriesLastSnapshotFileName	Stores the most recent copy of snapshot of dm_exec_query_stats saved from the previous execution of this package.	Variables
InterestingQueriesLastSnapshotFileNameOutput	Stores temporary copy of the most recent snapshot of dm_exec_query_stats	Variables
InterestingQueriesSnapshotFileNamePrefixPattern	Prefix for files related to dm_exec_query_stats collection.	Variables
ItemID		Variables
LoggingLevel		Variables
LogID		Variables
LoopDuration		Variables

LoopEventName		Variables
MDWConnectionString		Variables
ODS - Upload snapshots into active_sessions_and_requests table	OLE DB Destination	ComponentMetaDataCollection
ParentLogID		Variables
PipelineBufferLeak	After execution, some buffers were left outstanding. Some transform is hanging onto buffer references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.	LogEntryInfos
PipelineComponentTime	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.	LogEntryInfos
PipelineExecutionPlan	The execution plan of the data flow.	LogEntryInfos
PipelineExecutionTrees	The input the scheduler had when forming the execution plan.	LogEntryInfos
PipelineInitialization	Various information from Data Flow initialization.	LogEntryInfos
Raw File Source Output		PathCollection
RC - Count output rows	Counts the rows in a dataset.	ComponentMetaDataCollection
RFS - Read Current Upload Data	Extracts data from a raw file.	ComponentMetaDataCollection
Row Count Output 1		PathCollection
RowCount		Variables
SnapshotId		Variables
SnapshotQueryStatsQuery		Variables
SourceId		Variables
TargetConnectionString		Variables
TopThreshold		Variables

Package element: BufferSizeTuning

Properties

Name	Value
CreationName	
Description	The Data Flow changed the size of a buffer away from the default values. The event text includes the sizes and the reasons.
FrequencyHint	Proportional
Name	BufferSizeTuning

Package element: CacheDirectory

Properties

Name	Value
CreationName	
DataType	String

Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	CacheDirectory
Namespace	User
QualifiedName	User::CacheDirectory
RaiseChangedEvent	False

Version	4

Elements

Name	Description	Type
AccessMode	Specifies the mode used to access the database.	CustomPropertyCollection
AlwaysUseDefaultCodePage	Forces the use of the DefaultCodePage property value when describing character data.	CustomPropertyCollection
CommandTimeout	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.	CustomPropertyCollection
DefaultCodePage	Specifies the column code page to use when code page information is unavailable from the data source.	CustomPropertyCollection
FastLoadKeepIdentity	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadKeepNulls	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destinaton. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadMaxInsertCommitSize	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.	CustomPropertyCollection
FastLoadOptions	Specifies options to be used with fast load. Applies only if fast load is turned on.	CustomPropertyCollection
OLE DB Destination Error Output		OutputCollection
OLE DB Destination Input		InputCollection
OleDbConnection	The OLE DB runtime connection used to access the database.	RuntimeConnectionCollection
OpenRowset	Specifies the name of the database object used to open a rowset.	CustomPropertyCollection
OpenRowsetVariable	Specifies the variable that contains the name of the database object used to open a rowset.	CustomPropertyCollection
SqlCommand	The SQL command to be executed.	CustomPropertyCollection

Package element: AccessMode

Properties

Name	Value
ContainsID	False
Description	Specifies the mode used to access the database.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	18
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[AccessMode]
Name	AccessMode
ObjectType	OT_PROPERTY
State	PS_DEFAULT

TypeConverter	AccessMode
UITypeEditor	
Value	3

Package element: AlwaysUseDefaultCodePage

Properties

Name	Value
ContainsID	False
Description	Forces the use of the DefaultCodePage property value when describing character data.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	17
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[AlwaysUseDefaultCodePage]
Name	AlwaysUseDefaultCodePage
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	False

Package element: CommandTimeout

Properties

Name	Value
ContainsID	False
Description	The number of seconds before a command times out. A value of 0 indicates an infinite time-out.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	12
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[CommandTimeout]
Name	CommandTimeout
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	0

Package element: DefaultCodePage

Properties

Name	Value
ContainsID	False
Description	Specifies the column code page to use when code page information is unavailable from the data source.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	16
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[DefaultCodePage]
Name	DefaultCodePage
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	1252

Package element: FastLoadKeepIdentity

Properties

Name	Value
ContainsID	False
Description	Indicates whether the values supplied for identity columns will be copied to the destination. If false, values for identity columns will be auto-generated at the destination. Applies only if fast load is turned on.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	19
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[FastLoadKeepIdentity]
Name	FastLoadKeepIdentity
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	False

Package element: FastLoadKeepNulls

Properties

Name	Value
ContainsID	False
Description	Indicates whether the columns containing null will have null inserted in the destination. If false, columns containing null will have their default values inserted at the destinaton. Applies only if fast load is turned on.
EncryptionRequired	False

ExpressionType	CPET_NONE
ID	20
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[FastLoadKeepNulls]
Name	FastLoadKeepNulls
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	False

Package element: FastLoadMaxInsertCommitSize

Properties

Name	Value
ContainsID	False
Description	Specifies when commits are issued during data insertion. A value of 0 specifies that one commit will be issued at the end of data insertion. Applies only if fast load is turned on.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	22
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[FastLoadMaxInsertCommitSize]
Name	FastLoadMaxInsertCommitSize
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	
UITypeEditor	
Value	0

Package element: FastLoadOptions

Properties

Name	Value
ContainsID	False
Description	Specifies options to be used with fast load. Applies only if fast load is turned on.
EncryptionRequired	False
ExpressionType	CPET_NONE
ID	21
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Properties[FastLoadOptions]
Name	FastLoadOptions
ObjectType	OT_PROPERTY
State	PS_DEFAULT
TypeConverter	

UITypeEditor	
Value	CHECK_CONSTRAINTS

Package element: OLE DB Destination Error Output

Properties

Name	Value
Dangling	False
DeleteOutputOnPathDetached	False
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExclusionGroup	1
HasSideEffects	False
ID	131
IdentificationString	ODS - Upload snapshots into active_sessions_and_requests table.Outputs[OLE DB Destination Error Output]

Package element: PipelineBufferLeak

Properties

Name	Value
CreationName	
Description	After execution, some buffers were left outstanding. Some transform is hanging onto buffer

	references and if it freed them we would use a lot less memory. The logged text includes information about the transform that owned the buffer, and the ID of the buffer.
FrequencyHint	Proportional
Name	PipelineBufferLeak

Package element: PipelineComponentTime

Properties

Name	Value
CreationName	
Description	Information about each phase of validation and execution for each data flow component. The processing time of each phase is specified.
FrequencyHint	Proportional
Name	PipelineComponentTime

Package element: PipelineExecutionPlan

Properties

Name	Value
CreationName	
Description	The execution plan of the data flow.
FrequencyHint	Proportional
Name	PipelineExecutionPlan

Package element: PipelineExecutionTrees

Properties

Name	Value
CreationName	
Description	The input the scheduler had when forming the execution plan.
FrequencyHint	Proportional
Name	PipelineExecutionTrees

Package element: PipelineInitialization

Properties

Name	Value
CreationName	
Description	Various information from Data Flow initialization.
FrequencyHint	Proportional
Name	PipelineInitialization

Package element: Raw File Source Output

Name	Value
CodePage	0
ComparisonFlags	0
DataType	DT_I2
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	204
ID	152
IdentificationString	RFS - Read Current Upload Data.Outputs[Raw File Source Output].Columns[blocking_session_id]
Length	0
LineageID	152

MappedColumnID	0
Name	blocking_session_id
ObjectType	OT_OUTPUTCOLUMN
Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_NotUsed

Package element: blocking_session_id

Properties

Name	Value
CodePage	0
DataType	DT_I2
Description	
ID	204
IdentificationString	RFS - Read Current Upload Data.Outputs[Raw File Source Output].ExternalColumns[blocking_session_id]
Length	0
MappedColumnID	0
Name	blocking_session_id
ObjectType	OT_EXTERNALMETADATACOLUMN
Precision	0
Scale	0

Package element: collection_time

Properties

Name	Value
CodePage	0
ComparisonFlags	0
DataType	DT_DBTIMESTAMP
Description	
ErrorOrTruncationOperation	
ErrorRowDisposition	RD_NotUsed
ExternalMetadataColumnID	199
ID	147
IdentificationString	RFS - Read Current Upload Data.Outputs[Raw File Source Output].Columns[collection_time]
Length	0
LineageID	147
MappedColumnID	0
Name	collection_time
ObjectType	OT_OUTPUTCOLUMN

Precision	0
Scale	0
SortKeyPosition	0
SpecialFlags	0
TruncationRowDisposition	RD_NotUsed

Package element: collection_time

Properties

Name	Value
CodePage	0
DataType	DT_DBTIMESTAMP
Description	
ID	199

MaximumErrorCount	0

Name	FST - Delete uploaded cache file
Operation	2
OperationName	
OverwriteDestinationFile	False
PreservedAttributes	0
Source	User::CurrentCollectionCacheFileName
SuspendRequired	False
TransactionOption	Supported
Version	0

Elements

Name	Description	Type
CacheDirectory		Variables
CacheWindow		Variables
CollectionCacheFileName	Stores snapshots of dm_exec_requests	Variables
CollectionCacheFileNameOutput	Stores snpashots of dm_exec_requests. This variable is used as temporary cached file name during the upload.	Variables
CollectionCacheFilePrefixPattern	Prefix for files related to dm_exec_requets collection	Variables
CollectionSetUID		Variables
CollectorTypeUID		Variables
ConfigConnectionString		Variables
CurrentCollectionCacheFileName		Variables
DaysUntilExpiration		Variables
ExitEventName		Variables
FileSystemOperation	Provides information about running file system operations.	LogEntryInfos
InputParameters		Variables
InstanceID		Variables
InstanceName		Variables
InterestingQueries_HighCpuUsage		Variables
InterestingQueries_HighIoCount		Variables
InterestingQueries_HighMemoryUsage		Variables
InterestingQueries_HighTransactionCount		Variables
InterestingQueries_LargeResultset		Variables
InterestingQueries_LongRunningRequest		Variables
InterestingQueries_LongWaitingRequest		Variables
InterestingQueriesCount		Variables
InterestingQueriesLastSnapshotFileName	Stores the most recent copy of snapshot of dm_exec_query_stats saved from the previous execution of this package.	Variables

InterestingQueriesLastSnapshotFileNameOutput	Stores temporary copy of the most recent snapshot of dm_exec_query_stats	Variables
InterestingQueriesSnapshotFileNamePrefixPattern	Prefix for files related to dm_exec_query_stats collection.	Variables
ItemID		Variables
LoggingLevel		Variables
LogID		Variables
LoopDuration		Variables
LoopEventName		Variables
MDWConnectionString		Variables
ParentLogID		Variables
RowCount		Variables
SnapshotId		Variables
SnapshotQueryStatsQuery		Variables
SourceId		Variables
TargetConnectionString		Variables
TopThreshold		Variables

Package element: CacheDirectory

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	CacheDirectory
Namespace	User
QualifiedName	User::CacheDirectory
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	c:\perflogs
VariablePath	\Package.Variables[User::CacheDirectory]

Package element: CacheWindow

Properties

Name	Value
CreationName	
DataType	Int32
Description	

EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	CacheWindow
Namespace	User
QualifiedName	User::CacheWindow
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	1
VariablePath	\Package.Variables[User::CacheWindow]

Package element: CollectionCacheFileName

Properties

Name	Value
CreationName	
DataType	String
Description	Stores snapshots of dm_exec_requests
EvaluateAsExpression	True
Expression	@[User::CollectionCacheFilePrefixPattern] + ".cache"
IncludeInDebugDump	False
Name	CollectionCacheFileName
Namespace	User
QualifiedName	User::CollectionCacheFileName
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	c:\perflogs\ALEN-PC_MSSQL.1_{2DC02BD6-E230-4C05-8516-4E8C0EF21F95}_100_QueryActivity.cache
VariablePath	\Package.Variables[User::CollectionCacheFileName]

Package element: CollectionCacheFileNameOutput

Properties

Name	Value
CreationName	
DataType	String
Description	Stores snpashots of dm_exec_requests. This variable is used as temporary cached file name during the upload.
EvaluateAsExpression	True
Expression	@[User::CollectionCacheFilePrefixPattern] + @[System::ExecutionInstanceGUID] + ".temp.cache"
IncludeInDebugDump	False
Name	CollectionCacheFileNameOutput

Namespace	User
QualifiedName	User::CollectionCacheFileNameOutput
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	c:\perflogs\ALEN-PC_MSSQL.1_{2DC02BD6-E230-4C05-8516-4E8C0EF21F95}_100_QueryActivity{6F96425F-AEAD-4BF2-B22A-CD089311CA3E}.temp.cache
VariablePath	\Package.Variables[User::CollectionCacheFileNameOutput]

Package element: CollectionCacheFilePrefixPattern

Properties

Name	Value
CreationName	
DataType	String
Description	Prefix for files related to dm_exec_requets collection
EvaluateAsExpression	True
Expression	@[User::CacheDirectory] + "\\" + @[System::MachineName] + "_" + @[User::InstanceID] + "_{" + @[User::CollectionSetUID] + "}_" + (DT_WSTR, 10) @[User::ItemID] + "_QueryActivity"
IncludeInDebugDump	False

SystemVariable	False
Value	14AF3C12-38E6-4155-BD29-F33E7966BA23
VariablePath	\Package.Variables[User::CollectorTypeUID]

Package element: ConfigConnectionString

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	ConfigConnectionString
Namespace	User
QualifiedName	User::ConfigConnectionString
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	Provider=SQLNCLI11;Data Source=(local);Integrated Security=SSPI;Initial Catalog=msdb;APP=SQL Server Data Collector
VariablePath	\Package.Variables[User::ConfigConnectionString]

Package element: CurrentCollectionCacheFileName

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	CurrentCollectionCacheFileName
Namespace	User
QualifiedName	User::CurrentCollectionCacheFileName
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	C:\Users\macies\AppData\Local\Temp\ecodePerfWH\MACIES4_MSSQL.1_{{2DC02BD6-E230-4C05-8516-4E8C0EF21F95}}_100_QueryActivity.cache
VariablePath	\Package\FEF - For each collected cache file try upload.Variables[User::CurrentCollectionCacheFileName]

Package element: DaysUntilExpiration

Properties

Name	Value
CreationName	
DataType	Int16
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	DaysUntilExpiration
Namespace	User
QualifiedName	User::DaysUntilExpiration
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::DaysUntilExpiration]

Package element: ExitEventName

Properties

Name	Value
CreationName	
DataType	String

Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	ExitEventName
Namespace	User
QualifiedName	User::ExitEventName
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	EXITEVENT
VariablePath	\Package.Variables[User::ExitEventName]

Package element: FileSystemOperation

Properties

Name	Value
CreationName	
Description	Provides information about running file system operations.
FrequencyHint	Consistent
Name	FileSystemOperation

Package element: InputParameters

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	InputParameters
Namespace	User
QualifiedName	User::InputParameters
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	
VariablePath	\Package.Variables[User::InputParameters]

Package element: InstanceID

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	InstanceID
Namespace	User
QualifiedName	User::InstanceID
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	MSSQL.1
VariablePath	\Package.Variables[User::InstanceID]

Package element: InstanceName

Properties

Name	Value
CreationName	
DataType	String
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	False
Name	InstanceName
Namespace	User
QualifiedName	User::InstanceName
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	MSSQLSERVER
VariablePath	\Package.Variables[User::InstanceName]

Package element: InterestingQueries_HighCpuUsage

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	

IncludeInDebugDump	True
Name	InterestingQueries_HighCpuUsage
Namespace	User
QualifiedName	User::InterestingQueries_HighCpuUsage
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	5000
VariablePath	\Package.Variables[User::InterestingQueries_HighCpuUsage]

Package element: InterestingQueries_HighIoCount

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	InterestingQueries_HighIoCount
Namespace	User
QualifiedName	User::InterestingQueries_HighIoCount
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	500
VariablePath	\Package.Variables[User::InterestingQueries_HighIoCount]

Package element: InterestingQueries_HighMemoryUsage

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	InterestingQueries_HighMemoryUsage
Namespace	User
QualifiedName	User::InterestingQueries_HighMemoryUsage
RaiseChangedEvent	False
ReadOnly	False

SystemVariable	False
Value	12800
VariablePath	\Package.Variables[User::InterestingQueries_HighMemoryUsage]

Package element: InterestingQueries_HighTransactionCount

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	InterestingQueries_HighTransactionCount
Namespace	User
QualifiedName	User::InterestingQueries_HighTransactionCount
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	8
VariablePath	\Package.Variables[User::InterestingQueries_HighTransactionCount]

Package element: InterestingQueries_LargeResultset

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	InterestingQueries_LargeResultset
Namespace	User
QualifiedName	User::InterestingQueries_LargeResultset
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	1000000
VariablePath	\Package.Variables[User::InterestingQueries_LargeResultset]

Package element: InterestingQueries_LongRunningRequest

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	InterestingQueries_LongRunningRequest
Namespace	User
QualifiedName	User::InterestingQueries_LongRunningRequest
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	25000
VariablePath	\Package.Variables[User::InterestingQueries_LongRunningRequest]

Package element: InterestingQueries_LongWaitingRequest

Properties

Name	Value
CreationName	
DataType	Int32
Description	
EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	InterestingQueries_LongWaitingRequest
Namespace	User
QualifiedName	User::InterestingQueries_LongWaitingRequest
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	500
VariablePath	\Package.Variables[User::InterestingQueries_LongWaitingRequest]

Package element: InterestingQueriesCount

Properties

Name	Value
CreationName	
DataType	Int32
Description	

EvaluateAsExpression	False
Expression	
IncludeInDebugDump	True
Name	InterestingQueriesCount
Namespace	User
QualifiedName	User::InterestingQueriesCount
RaiseChangedEvent	False
ReadOnly	False
SystemVariable	False
Value	0
VariablePath	\Package.Variables[User::InterestingQueriesCount]

Package element: InterestingQueriesLastSnapshotFileName

Properties

Name	Value
CreationName	
DataType	String
Description	Stores the most recent copy of snapshot of dm_exec_query_stats saved from the previous execution of this package.
EvaluateAsExpression	True
Expression	@[User::InterestingQueriesSnapshotFileNamePrefixPattern] + "LastSnapshot.cache"
IncludeInDebugDump	False
Name	InterestingQueriesLastSnapshotFileName
Namespace	User
